B. GENERAL CONDITIONS
Section I - Promulgation of Contract

A. Intent:

The intent of the Contract Documents is to prescribe a complete work, which the Contractor agrees to do as evidenced by his entering into the Contract. Said complete work is to be performed in full compliance with said Contract Documents. The Contractor therefore agrees that he has examined all Contract Documents, the construction site, and other matters concerned with the project, and found them satisfactory to him for his completion of the work under the Contract Terms and Conditions, and within the Contract Time.

B. Use of Contract Documents:

The Contractor shall make plural and complete all work which, to avoid needless repetition or for the sake of brevity, has been shown singly or partially indicated. Materials or work described in words which, when so applied, have a well-known technical or trade meaning shall be held to refer to such recognized standards. The Contractor shall take no advantage of any errors, omissions, or discrepancies in the Contract Documents but shall comply with the intent of said Contract Documents and notify the Engineer in sufficient time to allow the Engineer to make such interpretation, correction or change as necessary for fulfillment of the intent. Such notice by the Contractor shall be his responsibility alone and failure to exercise it shall in no way relieve the Contractor from any provisions of these Contract Documents. It shall further be the responsibility of the Contractor to verify all dimensions in the field, including items to be fitted into existing constructions, and dimensions so verified shall take precedence over scale and figure dimensions on the drawings. Any deviation from the Contract Documents, which may be required for any reason shall in all cases conform to written instructions of the Engineer.

C. Relationship of Contract Document Items:

If the City and Contractor are unable to agree on a price for changed work, the City may order the Contractor to perform the work on a force account basis by means of a Work Order. Force account work will be compensated at the actual reasonable cost of labor and materials plus fifteen percent to cover overhead and profit. The City may require that the Contractor justify the cost of labor and materials by providing certified payroll documentation and copies of receipts for materials or equipment rental.  - b) Contractor's Letter of Warranty.
5. The City may elect to have some, or all the excess material generated by trench excavation delivered to the City's Public Works Yard at no additional cost to the City. "OR EQUAL" - In accordance with 2 CFR 200.319(c)(1), these Plans, Reports and Specifications have been prepared with the intent to incorporate a clear and accurate description of the technical requirements for the material, product, or services to be procured. Such a description is not intended to contain features which unduly restrict competition. The descriptions provided were prepared to include the qualitative nature of the materials, products, or services to be procured and sets forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications were avoided when possible. However, in some cases it was determined impractical or uneconomical to make a clear and

accurate description of the technical requirements without including brand and brand specific information. In all cases, Contractor acknowledges that any brand or brand specific information is to be read as “brand name or equivalent” as these descriptions are merely being used as a means to define the performance or other salient requirements of procurement and not to require a specific brand or supplier.

Whenever materials or equipment are specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular supplier, the naming of the item is intended to establish the type, function and quality required. Materials or equipment of other suppliers may be accepted by the Owner if enough information is submitted by the Contractor to allow Owner to determine that the material or equipment proposed is equivalent or equal to that named. Requests for review of substitute items of material and equipment will not be accepted by Owner from anyone other than Contractor and all such requests must be submitted by Contractor to City within thirty (30) calendar days after Notice of Award is received by Contractor.

If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make application to the City for acceptance thereof, certifying that the proposed substitute shall adequately perform the functions and achieve the results called for by the general design, meets regulatory requirements, be similar and of equal substance to that specified and be suited to the same use as that specified.

The application shall state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of substantial completion on time, whether or not acceptance of the substitute for use in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for the Project) to adapt the design to the proposed substitute and whether or not incorporation or use by the substitute in connection with the Work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service shall be indicated. The application also shall contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs for redesign and claims of other contractors affected by the resulting change, all of which shall be considered by the City in evaluating the proposed substitute. The City may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

If a specific means, method, technique, sequence, or procedure of construction is indicated in or required by the Contract Documents, Contractor may furnish or utilize a substitute means, method, sequence, technique or procedure of construction acceptable to the City, if Contractor submits sufficient information to allow the City to determine that the substitute proposed is equivalent to that indicated or required by the Contract Documents. The procedures for submission to and review by the City shall be the same as those provided herein for substitute materials and equipment.

The City shall be allowed a reasonable time within which to evaluate each proposed substitute and, if need be, to consult with the Design Professional. No substitute will be ordered, installed or utilized without the City's prior written acceptance, which shall be evidenced by a Change Order, a Work Directive Change, a Field Order or an approved Shop Drawing. Owner may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

H. American Iron and Steel Requirements:

** Workers in this classification may be entitled to a higher minimum wage under Executive Order 14026 (\$17.20) or 13658 (\$12.90). Please see the Note at the top of the wage determination for more information. Please also note that the minimum wage requirements of Executive Order 14026 are not currently being enforced as to any contract or subcontract to which the states of Texas, Louisiana, or Mississippi, including their agencies, are a party.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union

average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

AIS COMPLIANCE DOCUMENTATION - REQUIREMENTS

AMERICAN IRON AND STEEL COMPLIANCE INFORMATION, FORM AND INSTRUCTIONS

Background: The American Iron and Steel (AIS) provisions of P.L. 113-76 Consolidated Appropriations Act, 2014 are applicable to this project.

Compliance with the Act is **NOT** optional.

Please note: The compliance information, form and instructions contained in this section are designed to minimize the administrative burden associated with compliance of the AIS requirements and does not relieve the proposer and/or successful bidder from fully reading and comprehending the requirements of the applicable regulations.

The Act states (in part):

Sec. 436. (a)(1) None of the funds made available by a State water pollution control revolving fund as authorized by title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.) or made available by a drinking water treatment revolving loan fund as authorized by section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j-12) shall be used for a project for the construction, alteration, maintenance, or repair of a public water system or treatment works unless all of the iron and steel products used in the project are produced in the United States.

(2) In this section, the term “iron and steel products” means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials.

The following pages provide a list of materials typically requiring AIS compliance. The list is **not** intended to be all inclusive. It is designed to serve as a guide with examples of materials commonly requiring AIS compliance. The successful bidder should contact the Owner or the Owner’s designee with any questions regarding the applicability of AIS for a certain material **prior** to installation.

Compliance: The contractor must submit all required AIS compliance documentation with each Pay Application. The form and instructions on the following pages define the required AIS compliance documentation.

Non-Compliance: Failure to comply with AIS requirements will result in the following actions:

1. The contractor will be required to replace any non-compliant materials at their expense with no additional cost to the Owner.
2. The Owner will withhold payment from the contractor for any costs related to non-compliant materials and the labor associated with these materials until such time as a replacement can be completed. The amount withheld will be determined based on the value of the replacement item and the estimated labor cost to install it.
